

Biology Modules

Properties of Water & Photosynthesis

Participants will investigate the properties of water and its significance to life. Additionally, photosynthesis, including the light dependent and light independent reactions, will be explored. Materials will be provided for teacher use in the classroom. This module is part of a series of integrated, authentic inquiry-based modules aligned to the Arkansas Science Standards. All materials are provided free of charge. Instructional facilitation will also be provided for the teacher upon completion of this professional learning.
